<b>Microfilm Comments:</b>													
5/19/44	8	No.3 engine went out over target, came back alone											
5/30/44	18	Mission aborted after take-off. A/C landed at Bassingborne with No.3 engine feathered. Airplane was checked at Bassingborne by station engineering officer and No.3 engine was checked OK. Pilot reported that No.3 oil pressure dropped to 45 pounds and oil temperature went to 100 degrees. Ground check didn't show any defect for that engine. A/C came into this station #131 at 1400, May 30, 1944. All engines ground checked satisfactory.
